BOROUGH OF GLASTONBURY.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR
ENDED 31st DECEMBER, 1967.

Tel: Wells 3379 (Office)
Wells 2643 (Residence)

Area Health Department,
St. Lawrence Lodge,
37, Chamberlain St.
WELLS.

BA5 2PQ.

11th November, 1968.

To The Mayor, Aldermen and Councillors of
the Glastonbury Borough Council.

Mr. Mayor, Aldermen and Councillors,

I have pleasure in presenting the Annual Report on the Health of the Borough for 1967, prepared in accordance with the Public Health Officers' Regulations, 1959, and Ministry of Health Circular 1/68.

The vital statistics for the year again give satisfaction in that they show a healthy preponderance of births over deaths in the Borough, a birth rate better than national or county average, no still births and no infant or maternal deaths. There was a rise in the number of deaths in later life, and those due to heart disease and lung cancer are to be particularly regretted in view of the national publicity given to the strong association between heavy cigarette smoking and these two illnesses.

No outbreaks of major infectious disease were reported but there was the usual biennial wave of measles.

A report is again given of the work of the Mass Radiography in the town, by kind permission of the Director, but due to the change over to the computer system at County Hall for the recording of vaccinations and immunisations, figures are no longer available for the number of these carried out during the year.

On the environmental side, as detailed by the Public Health Inspector to whom I am most grateful for his contribution to the Report and co-operation at all times, improvements have been made in housing matters and consideration given to the overloading of the Sewage Works. As might be expected in an area popular for retirements, visits to elderly people showed an increase during the year but statutory action under the National Assistance Act was not required.

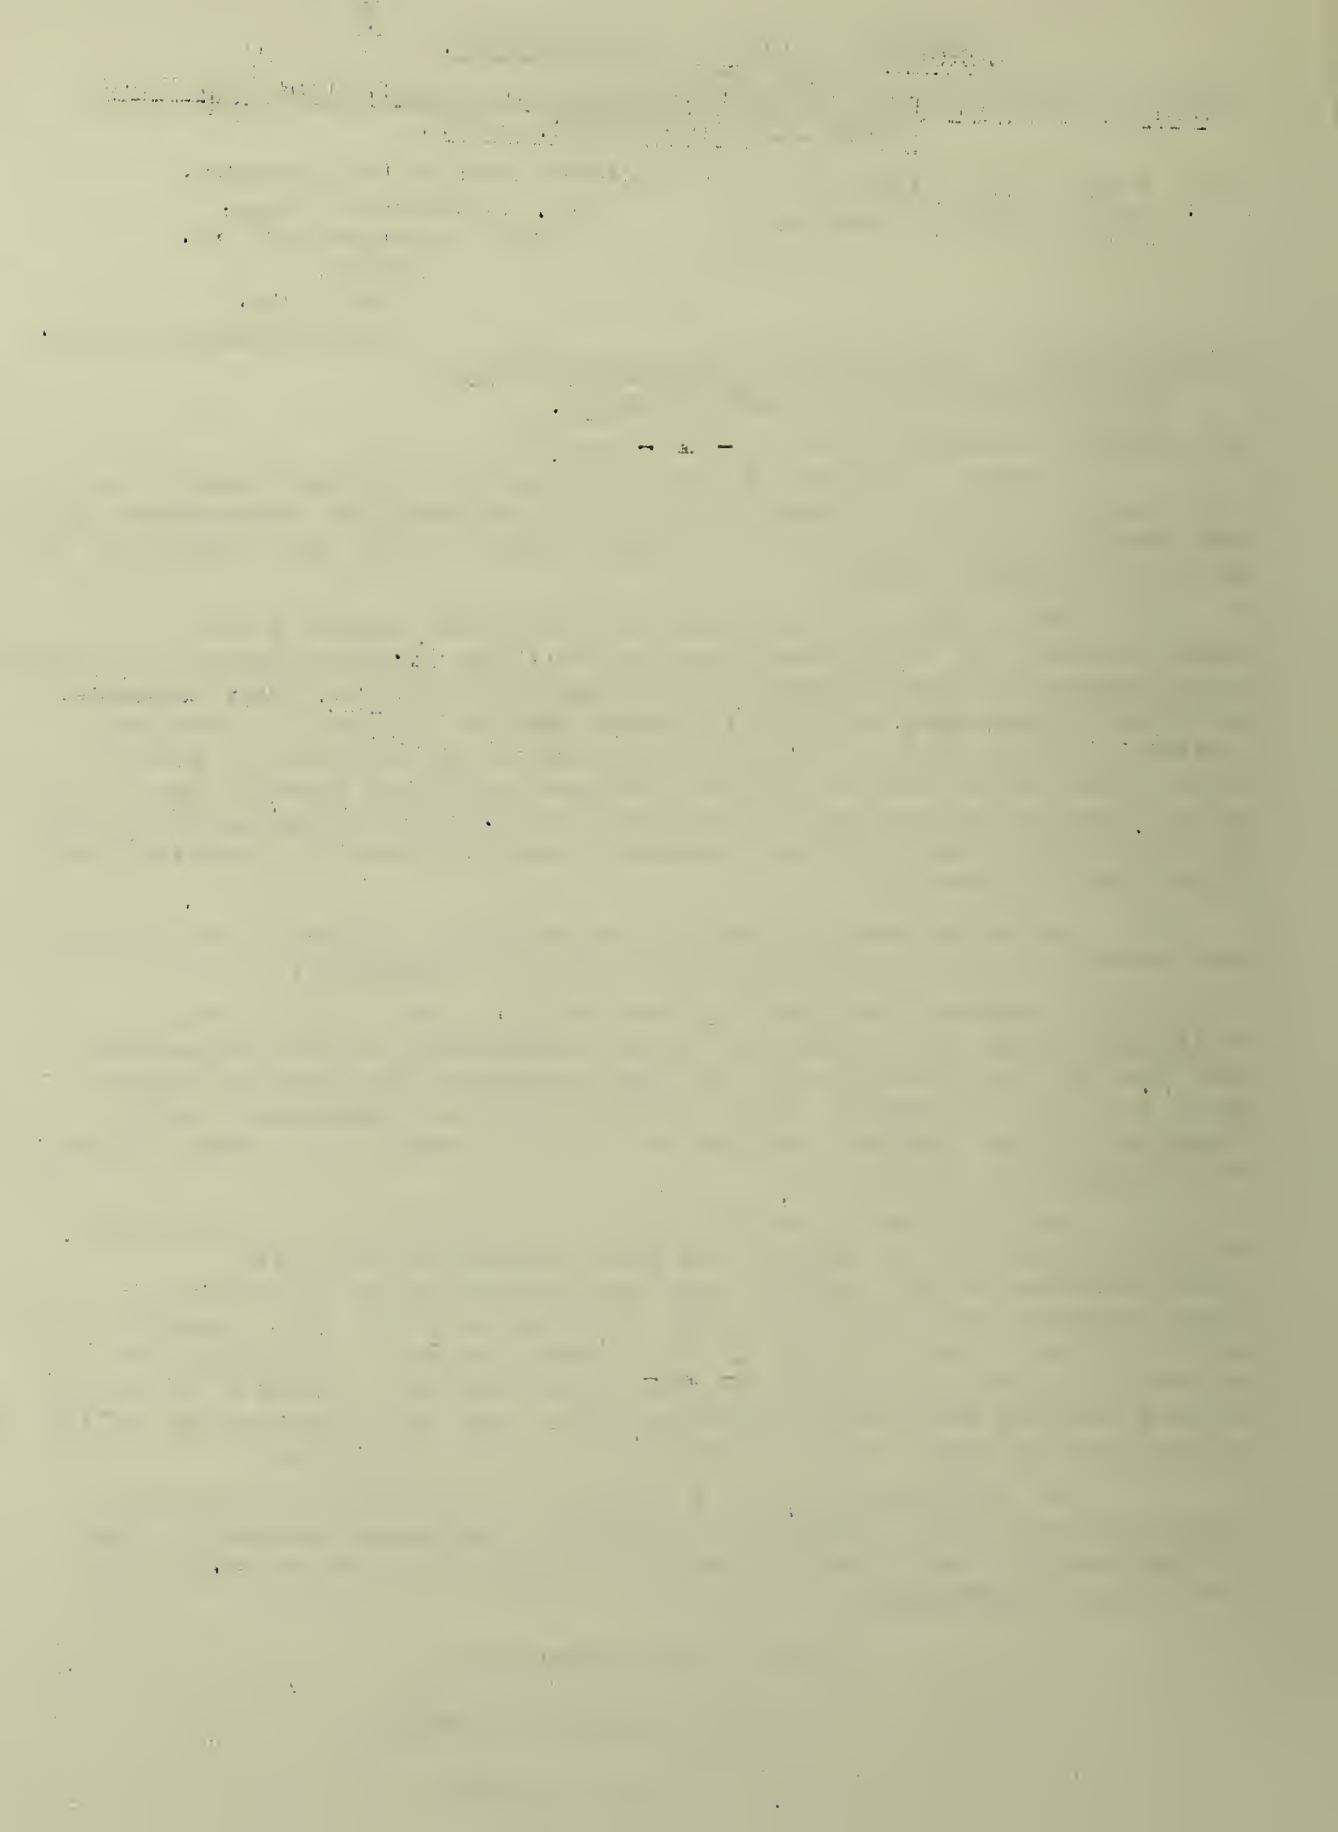

In conclusion, may I express my thanks to the Town Clerk and all his Officers for their continued support, and to Members of the Council and colleagues in the Borough for their consideration.

I have the honour to be,

Your obedient servant,

D. E. CLARE.

Medical Officer of Health.

NOTES ON VITAL STATISTICS FOR 1967.

(Although as a general rule the figures are too small for much significance to be attached to them, nevertheless certain broad statements can be made).

Population

An increase of 50 over the mid-year population for 1966 was estimated by the Registrar-General and births exceeded deaths by 31.

Births.

Live Births.- totalled much the same as in the previous year, as did the number of illegitimate births, giving once again a Corrected Birth Rate better than the National or County rates.

Still Births.- it is a pleasure to note that none were recorded in the Borough during 1967.

Deaths.

All Ages - totalled 17 more than in 1966, giving a Corrected Death Rate higher than the County figure but identical with the National average.

Infant Mortality - in contrast to the higher age groups, it is gratifying to note that there were no infant deaths during the year.

Maternal Mortality - once again, no women died in the Borough as a result of pregnancy, childbirth or abortion.

Causes of Death.

Cardio-Vascular Diseases - again caused by far the largest number of deaths in the Borough (41), with 10 more than in 1966. Of these, Coronary and Other Heart Disease accounted for 33 deaths, and Vascular Lesions of the Nervous System for 8, all over the age of 45 years.

Cancer Deaths - took second place with 13, 5 more than in the previous year, and of these it will be seen that as regards site, lung cancer and lymphatic and other malignant neoplasms accounted for 4 deaths each, breast and stomach followed with 3 and 1 deaths, and leukaemia with 1 death.

Respiratory Diseases - caused one more death than in 1966, and of these 9 deaths, pneumonia accounted for 5 and bronchitis for 3. With the exception of one death in the 35-45 years age group, the rest were over the age of 55 years.

Accidents - deaths by accident rose to 5, of which 3 involved a motor vehicle.

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

IN RESPONSE TO A RESOLUTION OF THE HOUSE OF REPRESENTATIVES, PASSED MAY 1, 1890, RELATIVE TO THE LANDS BELONGING TO THE UNITED STATES.

AND IN ACCORDANCE WITH A RESOLUTION OF THE SENATE, PASSED MAY 1, 1890, RELATIVE TO THE LANDS BELONGING TO THE UNITED STATES.

FOR THE YEAR ENDING DECEMBER 31, 1890.

ALBANY, N. Y.: PUBLISHED BY THE NATIONAL PRINTER, 1891.

THE COMMISSIONER OF THE GENERAL LAND OFFICE.

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE, IN RESPONSE TO A RESOLUTION OF THE HOUSE OF REPRESENTATIVES, PASSED MAY 1, 1890, RELATIVE TO THE LANDS BELONGING TO THE UNITED STATES.

AND IN ACCORDANCE WITH A RESOLUTION OF THE SENATE, PASSED MAY 1, 1890, RELATIVE TO THE LANDS BELONGING TO THE UNITED STATES.

NOTIFIABLE DISEASES.

From the 5-year Table it will be seen that measles rose to its usual two-yearly peak. For the third year running there were no cases of tuberculosis or any of the major infectious diseases.

ANNUAL RETURN OF FOOD POISONING NOTIFICATIONS.

No cases of food poisoning were notified during the year in the Borough.

NATIONAL ASSISTANCE ACT, 1948, (Sec.47) AND AMENDMENT ACT, 1951.

An elderly widow of 80 years, living on her own in deplorable conditions, was visited several times by the Health Inspector, the Social Welfare Officer and myself and eventually persuaded to accept admission to Part III accommodation at Fletcher House, Wells, where she has settled in very well.

Another elderly widow of 79 years, living on her own in substandard housing, was satisfactorily accommodated in Fletcher House after a visit and communication with the Senior Social Welfare Officer at Bridgwater.

An elderly diabetic, living on his own in deteriorating conditions, was visited by the Public Health Inspector and myself and eventually persuaded with the help of his relatives to accept long-term hospital admission for treatment of his condition.

MASS RADIOGRAPHY SERVICE.

The Unit visited St. Dunstons Car Park at fortnightly intervals throughout the year for the benefit of general practitioner cases and the number of these cases attending was 152. Results were as follows:-

	Male	Female	Total
Numbers examined.	192	191	383
Abnormalities detected.	5	2	7

DETAILS OF ABNORMALITIES DETECTED

	Male	Female	Total
Healed Pulmonary Tuberculosis	-	1	1
Bronchial Carcinoma.	1	-	1
Enlarged Heart.	1	1	2
Pneumonitis,.	1	-	1
Bronchitis and Emphysema.	2	-	2

IMMUNISATIONS AND VACCINATIONS.

Figures of children immunised and/or vaccinated in 1967 cannot be given as, owing to the change to the computer system under which, it is hoped, all children will automatically be called to receive vaccinations and immunisations as they become due (unless a definite refusal is given), no records of immunisation and vaccination were kept for that year. - 6 -

DRAINAGE AND SEWERAGE.

Future Proposals.

Sewage Pumping Station and Pumping Main adjoining Paradise Allotments to take drainage of a housing development scheme proposed to be carried out by the Council, North of Benedict Street and West of Northload Street, for approximately 250 houses. This work has been commenced but not yet completed.

Sewage and Trade Waste Disposal Scheme.

The Sewage and Trade Waste Disposal Works continue to be overloaded by excessive flows from the two Traders discharging into the Works and the Council and their Consulting Engineers are still considering the question of enlarging the Works in order to provide a satisfactory effluent. The question of the Traders reducing their flows to the maximum permitted by the agreement with the Council is also a factor under consideration.

REGISTERED COMMON LODGING HOUSES.

No registered common lodging houses within the Borough, therefore no action necessary during the year.

H O U S I N G .

Action taken during year:-

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is essential for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It highlights the need for a systematic approach to data collection and the importance of using reliable sources of information.

3. The third part of the document describes the process of interpreting the data and drawing conclusions from it. It stresses the importance of being objective and unbiased in the analysis and of considering all relevant factors.

4. The fourth part of the document discusses the role of the research team and the importance of collaboration and communication among team members. It emphasizes that a strong team is essential for the success of any research project.

5. The fifth part of the document concludes by summarizing the key findings of the study and providing recommendations for future research. It notes that while there is still much to be learned, the current study has provided valuable insights into the topic.

- (11) Substitution of Closing Order for Demolition Order (Housing Act, 1961) Action taken. Nil

Since the War, up to the end of 1967 a total of 444 new dwellings have been completed by the Local Authority, 399 by Private Enterprise and 69 units of accommodation have been provided by conversion, adaptation, or reconstruction, and three units of accommodation have been lost, one by conversion into business premises and two by conversion of two houses into one to accommodate large families, making a provision for 912 families in all.

Up to the end of 1967 action has been taken under Section 16 of the Housing Act, 1957, in respect of 128 houses, and in all cases the Owners gave written undertakings in accordance with the Act not to relet them for human habitation when they became vacant. At the end of the year one of these dwellings remained occupied. Five have been reconstructed and brought back into use as dwellings. Eighty-seven houses have been demolished, and six houses have been purchased by Agreement and demolished or closed in connection with the Redevelopment of Hill Head Area.

Negotiations have been completed for the purchase of houses by Agreement, nine houses on the South side of Hill Head and three houses in Northload Street. All twelve of these houses are closed and will be demolished during 1968.

Negotiations for the acquisition of three houses in Old Wells Road, where action had been taken under the Housing Acts, have

been completed and these will be demolished during 1968.
